

Commands and Scripts

Task 2 – Basic Firewall Configuration Using UFW

Commands Executed

1. Check current firewall status

```
sudo ufw status
```

2. Allow SSH traffic (Port 22)

```
sudo ufw allow ssh
```

3. Deny HTTP traffic (Port 80)

```
sudo ufw deny http
```

4. Enable the firewall

```
sudo ufw enable
```

5. Verify firewall status with detailed output

```
sudo ufw status verbose
```
